Personal Correspondence

Dear Frelled (Squad)

Our Ref: N24025/SA/3

Due to a clerical side-effect you were not assigned the correct number of "Blue"-code BPNs between SCL 10.0 and SCL 10a.9.

As a result, you have not met the minimum requirements for promotion to SCL 9.0.

Our alternatives at this point are 1) trim your SCL to 10a.0 and revert your assignment profile to blue-only; or 2) offer you the opportunity to undertake an intensive 24-hour "clearance period".

If you accept the second option, you will be wired a series of Blue BPNs as they become available. You will be expected to complete each one with minimal service support. At the end of the 24 hours, your performance will be evaluated based on the number of BPNs successfully completed; the number failed; the amount of service support you used; and your thoroughness in adhering to the mission statements.

Payment will be made in full as per BPN specifications; SCL increase will be withheld until your evaluation. If, and only if, your evaluation is successful you will retain your current SCLs.

Warmest regards

Bart Wald
